

Instructions for unzipping files and downloading the Macromedia Flash player

How to Unzip compressed (zipped) files:

You will need to download WinZip from <http://www.winzip.com/> the download is fully functioning evaluation software.

Install WinZip and double click on "KS3 Hand Held Technology project.zip" to open the file.

Select WinZip Classic mode.

Click the Extract button.

In the "Extract to" entry box, locate the folder where you will store the unzipped files

Make sure that the "Use folder names" and "All file/folder in archive" check boxes are checked.

Click "Extract".

The file is unzipped. Now you can close WinZip.

How to install the Macromedia Flash Player:

Click this link to visit the Macromedia Flash player download page
http://www.macromedia.com/shockwave/download/download.cgi?P1_Prod_Version=ShockwaveFlash.

Follow the on-screen instructions.

That's it. Your computer will now play the Flash video embedded in the PowerPoint presentations
